

Smaran Khadka

Arlington, TX 76013 (940) 354-5361 sxk6436@mavs.uta.edu

Research Interests

Interdisciplinary research at the intersection of Computer Engineering and medicine, with particular interest in embedded systems and IoT applications for healthcare, wearable monitoring technologies, medical imaging, computer vision for disease detection, and computational approaches in bioinformatics. Motivated to develop technology-driven solutions that improve healthcare accessibility and clinical decision-making.

Education

Bachelor of Science in Computer Science

Expected: May 2029

The University of Texas at Arlington, Arlington, TX

Technical Skills

Programming: Python, C

Tools: Git, Microsoft Office Suite, Google Workspace

Core Competencies: Data documentation, analytical problem-solving, structured troubleshooting, technical communication

Relevant Experience

Trailblazer Tour Guide

Sep 2025 – Present

Dan Dipert University Welcome Center, Arlington, TX

- Communicate complex academic and technical information clearly to diverse audiences.
- Coordinate logistics for large groups while maintaining structured scheduling and safety protocols.
- Develop strong professional communication and public presentation skills.

Database & Social Media Assistant

Oct 2022 – Nov 2024

Pacific Nepal, Kathmandu, Nepal

- Maintained structured records of material purchases and sales transactions using organized data practices.
- Assisted in data tracking and documentation to improve operational accuracy.
- Applied basic analytics and iterative testing to evaluate engagement strategies.

Teaching Intern

Aug 2024 – Nov 2024

Centre for Children with Intellectual Disabilities, Kathmandu, Nepal

- Observed behavioral and learning patterns to improve instructional approaches.
- Designed structured classroom activities based on data-driven observations.
- Collaborated with educators to refine learning materials and documentation processes.

Coursework & Training

Python with Data Science

Feb 2025 – Apr 2025

Panacea Solutions, Kathmandu, Nepal

- Applied Python for data analysis and basic computational problem-solving.
- Gained exposure to structured data manipulation and visualization techniques.
